

FRENCH PEOPLE 90 PERCENT PRO-BRITISH

# Would Rather Suffer Than Help Their Conquerors

**Opposed To Any Scheme By Which Food Allowed Get Through Blockade**

By WILLIAM H. STONEMAN

EDMONTON, July 15.—(CP)—The people of France are positively opposed to any scheme under which large quantities of foodstuffs, or anything else, would be sent to France by the United States, completely unbiased observers report.

According to these people, the French can now be described as 90 per cent pro-British and so bitterly anti-German that they would oppose any scheme instrumental in helping their conquerors. All they want the United States to do there are

24,677 Persons See Exhibition On Opening Day

Continued from Page One

the park, and after the grandstand show the greatest crowd ever seen on an opening evening thronged to the midway.

Long before the evening show began, the ring was scheduled to start, hundreds of patrons lined up outside the grandstand gates waiting for them to open. There was a larger crowd than usual on hand for this performance and all were enthralled with the magnificence of the performances.

**FINE RACING CARD**

At the races the long shot players had a field day, if they were on the right long shot.

The double feature admission of \$40.00 to \$100.00 for a two dollar investment, and the Quinella \$20.50.

Longest shot was the race was Mrs. E. E. Thompson, Little Silent, winner of the first race.

This game little made even a profit, but the track was open to win \$16.75 to place and \$5.00 to show.

It was a final day for Jockey 3, Northeast. This Edmonian lad, taking his first ride on a major racing track made it a winning one, and the track was the starting gate like a streak and had it well placed in the hard drive. The track was off when he swung right to the rail and went into a strong lead and never had to be ridden hard to the result. Young Northeast rode with good success at the recent Belmont Stakes.

Other games along to score during the afternoon were: Baby, won by H. C. Taylor, Los Angeles. Coffey, won by H. C. Taylor, and the favorite Suzy Su by a nose to pay off at \$3.65 to win \$8.00 to place and \$2.00 to show. The daily double for five lucky ticket holders. Favorites got to the wire first in all seven races.

**NO COMPLAINTS**

Police reported one of the quietest days on record not a single complaint was made.

In the afternoon or evening, while the firemen had only one call to answer, this being to the small number fire just outside the grounds.

**F.D.R. Asks House For Daylight Time**

WASHINGTON, July 15.—(AP)—President Roosevelt asked Congress today for legislation to provide daylight saving time for all national or national bases, and for such part or all of the year, as he might determine, as a measure of national defense.

The President made the statement in a speech to the Senate.

Sen. Raymond and Vice-President Henry Wallace, supporting it, said that the effect of saving daylight would result in a probable annual reduction of 700,000 kilowatt-hours in the use of electricity in the United States.

Mr. Roosevelt also went on to say that southern cities, calling for a need for daylight time and declaring the country "faces with a new power shortage that is impending the national defense program."

VISIT MANUFACTURERS' BUILDING

## Commercial Exhibits at City Fair Reach High Standard

## Business Houses Give Quality Displays For Last Show During War

This may be the last of the Edmonton Exhibition for the duration of the war, but Edmonton and Alberta manufacturers have not let that possibility cut down on their usual high standard of exhibits in the Manufacturers' building at the exhibition grounds.

They have arranged displays this year which emphasize artistry, and interest with the best shown at past fairs. The big and dramatic scenes in the building on opening day were proof of that fact.

A new booth was struck in most exhibits this year, with flags, bunting and portraits of the Empire in abundance at all the booths.

A favorite with visitors to the building in past years has been the lucky draw contest, and many things are again being featured by many firms.

The business page was taken on a gala appearance... a final gala, the display of the Empire, the Royal Canadian Air Force, and other firms have gone "all out" to make this year's fair one that will be remembered for its variety and its exceptional display of merchandise and products.

NATIONAL HOME FURNISHINGS LIMITED

Amplifying its motto "complete home furnishings," the exhibit of the National Home Furnishings, which has been a feature in the Manufacturers' building this year is not for its marked beauty, but for its marked utility.

Featuring Canadian-made furniture, the display includes a bedroom suite, a dining room suite, and a selection of kitchen articles. All are arranged to show how each item aims "satisfaction to the customer."

Backgrounds for the bedroom and dining room sets, shown in a pleasing color scheme, are a range of colors for materials in the furniture.

Free tickets are distributed and every night draws are made for the several prizes offered. Many worthwhile prizes have been offered to lucky ticket holders. Draws take place at the National Home Furnishings booth at 8:30 p.m. each night of the fair.

Adding a finishing touch to the window display is a setting of pictures of the King, Queen, and Prime Minister Churchill placed under a glass frame. "There'll Always be an England."

The firm is famous for its special features, and the display shows the special houses offered on articles displayed.

## Products Are Accommodated Here During Exhibition Week

Well built fit the room. "What Alberta Makes, Makes Alberta?" If you don't believe that, just drop in to the Provincial Building tent during the exhibition grounds.

Over 60 Alberta manufacturers have their goods on display in the tent and many more will. If there is a particular article you are interested in, drop in to the Manufacturers' booth to prove you're right.

Shiny new feature in kitchen appliances is the gas range that carries a guarantee of "no fumes."

The gas circulates the heating plate and the flame, thus "drying out" any danger of a spreading fume.

A feature which strikes visitors

is the Crescent cabinet. It's the new flex-steel construction principle... and if you are at all sceptical about the whole thing... here's a demonstration outfit right for you. Just drop in to the booth to prove you're wrong.

"On to Victory" is an illuminated display stand lends a patriotic air to the general home theme that runs throughout the Crescent exhibit.

EDMONTON CITY DAIRY

Fair week is always looked upon as a "warm, if not hot, weather week." The Edmonton City Dairy

has been well thought in mind in planning their exhibit this year. For feature of their display, which is found in an end bay of the Manufacturers' building, is a beautiful "Sunny Boy" bicycle. Carrying the entire display is "brought up" with girl, canoe, sand,

fishin' rod, "everything."

The girl is carrying an ice cream "delight," and the whole scene fits in with the theme "Recreation as a mountain breeze."

Attached to the display is the side Dairy products—milk, butter, health products are dispensed.

### Off To A Good Start

With fine weather, good opening day  
crowds, a remarkable array of exhibits  
and varied and interesting program  
of entertainment features, the Fair  
opened yesterday under most favorable  
auspices.

There is a prospect that before the  
week is out new all-time attendance  
records will have been established, as  
occurred in Calgary last week. All  
roads in central and northern Alberta  
will be filled with people for the next  
few days, with people from all parts  
converging upon the city by car, train,  
bus and plane. With them will come  
large numbers from points far afield.  
Licensed places representing every  
type of amusement in the province  
have been in evidence on the streets  
during the last day or two, and they  
will multiply as more tourists include  
Fair-time Edmonton in their swing  
around the west.

There is the possibility that accom-  
modation in the city may be taxed. In  
which event it will become the duty of  
householders to play hosts in something  
more than the nominal sense of the  
term. It would not do that visitors  
should be unable to find a sheltering  
place in a place like Edmonton or  
Edmonton. Any other way in which  
city residents can help to make the  
stranger feel that he has come to a  
friendly and thoughtful welcome also  
involves a duty, and a privilege.

Courtesy and thoughtfulness, will  
find many opportunities to do a service  
to some one who has come to see what  
kind of a city Edmonton is, and what  
sort of people live here, as well as to  
take in the sights at the Fair.

### The Syrian Base Changes Hands

The "melancholy" business in Syria  
is over. An armistice on Sunday stood  
the war there which no one but  
the Axis dictators and the Soviet  
enslaved French, Syrians and British  
there will be satisfaction that fighting  
has ceased; and even in occupied  
France there must be wide popular  
relief that it ends with Syria free of Axis  
control.

This happy conclusion of the affair  
deprives the aggressors of a base of  
which they already have made some  
use and which they undoubtedly intend  
as jumping off point for an attack  
on Iraq. Egypt is also in Britain's  
Allied forces on the border of Turkey,  
and lessens the pressure that Berlin  
and Rome can exert at Ankara.

Perhaps not less important, with  
peace restored, is the return to the  
Geman-Armenian army in Libya, and to  
resume active operations against Mus-  
solini's forces elsewhere in the Medi-  
terranean. It will not be strange if  
Naples and other Italian places get  
frequent visits of Axis war planes in  
the near future, and the newly  
acquired Axis strongholds in the  
Balkan areas come in for bombings.

Senator Wheeler is getting a good  
deal of attention of the right kind for  
having informed German and Italian  
agents that British forces are on  
attack in Sicily. What he spoke  
to the occupational forces were on their  
way to the island, through the waters  
infested by Nazi submarines. He may  
not have meant to endanger the lives  
of the seamen, but it is lucky for him  
no U-boat commander was able to make  
use of the tip.

have gained the record-making vic-  
tories it was to announce at the  
week-end. At most the official com-  
municate seems to mean that the  
invaders had somewhat the best of heavy  
fighting that was still in progress.

### Hitler Makes Another Pact

Great Britain and Russia have made  
a mutual assistance pact. Herr Hitler  
has thus brought about the agreement  
which the British government in vain  
sought to arrange on the eve of war in  
1939. Moscow's offer to help him out  
of his difficulties has been on the  
cards for some time since the day when an  
alliance with the democracies was turned  
down for a trade deal with the Reich. Perhaps  
its confidence in Russia's ability  
to stand alone has also suffered  
some abatement in the light of sub-  
sequent events.

The new agreement is said to contain  
two clauses. The first binds each of the  
two countries to help each other's war  
effort in any way it can. The second  
binds each to not make peace with the  
Axis without consent of the other.

The mutual-help clause is the less  
surprising. The reason is that the reason  
that even without any agreement self-  
interest bound both countries to assist  
each other in any practicable way. To  
not do so would be suicidal folly.

The pledge that neither will make a  
separate peace is likewise guardedly  
stated. The reason is that it has to  
take the other's word as sufficient.  
While Hitler is unbeaten, a separate  
peace for either could only mean dis-  
memberment and enslavement. When  
he has been beaten, neither will be  
under any pressure to make a separate  
peace.

The pact is formal official recogni-  
tion that realities have driven the sur-  
viving European democracy and the  
Soviet state into mutual dependence  
upon each other. These are those  
Soviet allies which Hitler himself  
would himself may relish it more  
than they do. But the fact remains.  
Whatever British people may think  
of the Russian system of government and  
whatever Russians may think of the  
British system, the fact is that the two  
have made it a matter of  
plain sense that they stand together  
until the threat has been destroyed.

Watson reports conditions of the  
wheat crop in the northern prairies as  
per cent of the yield for the year  
at 30th. Continued hot dry  
weather in Saskatchewan is said to have  
cut down the prospective yield heavily  
over a large part of the province, which  
may account for the slump in the gen-  
eral average. Last harvest's yield is not  
here yet, and the threshing machine  
has a habit of disregarding predictions.

Well for the benefit of the public  
as a whole, I think the situation should be  
as follows. So let's start first with the  
assumption that we have a circular  
market for all the wheat produced.  
Here are Ottawa's official figures.  
For the week ending July 5, 70,742  
bushels of wheat were shipped with 65,966  
in the corresponding week last year, an increase of  
13,756 bushels. This is the first week  
that there was a shortage of hog  
deliveries. Now Mr. and Mrs.  
Clegg why the appeal to buy less, and  
why have we an increase of  
2,000,000 bushels of pork of all classes  
for delivery?

The marketing and grading for the year  
to July 5, 2,973,724 head as compared to  
2,388,411 head in the corresponding  
year last year. In the case of hogs  
54,912 bushels of pork striking the  
average at 160 bushels. In pounds of  
hog meat per head the average has  
dropped to a finer point, there is approximately  
only 80% of all hogs marketed  
suitable for bacon. The actual  
increase in pork suitable for bacon  
74,791,680 pounds. Now Mr. and  
Mrs. Clegg why the appeal to buy less,  
and why have we an increase of  
2,000,000 bushels of pork of all classes  
for delivery?

The answer is that in the week ending  
July 5, 335 heads of hogs were shipped from  
Edmonton to the U.S. on a pork pound  
basis. 54,912 bushels. Then there was a much  
larger shipment west from Canada.  
As I have not the official figures in this  
case I do not quote them. For the purpose  
of this article I will assume that the  
one week ending July 5, after a  
has been going on week by week for a  
considerable time, the market is still  
the same as it was for the  
for the raise in prices to Britain and the  
Canadian consumer.

The answer is that sink Britain's  
supplies in the Atlantic are taken care of  
by the Royal Navy. What about the  
subsidy to Britain? Calgarian in the  
nature of livestock brokers, it  
is peddling Britain's supplies by diverting  
large numbers of hogs to the U.S. for a  
commission of a few dollars a head.  
W.M. YOUNG.

Reported that President Schlesinger  
has been captured near Waterloo, Transvaal,  
and is now in the hands of the Germans.

Johnnes Coetzee, captured with Marais  
the rebel who was hanged near Middleburg,  
was publicly executed for treason at Cro-  
dodell Park.

Edward Hanlan, the Toronto orator,  
will leave that city for Columbia university.

The C.P.R. won the tax case against  
Winning, before the Privy Council.

1911—30 Years Ago

Troops were again running on the C. and E.,  
the blockade caused by the trachoma's strike  
having been broken.

London: Lord Kilchener, reports that  
Spartacus, a brigade of 1,000 men, under  
Tunstall Steyler, and the documents of the  
so-called Orange Free State government,  
should be condemned by the public  
buildings in Mayfair, London.

Reported that President Schlesinger  
has been captured near Waterloo, Transvaal,  
and is now in the hands of the Germans.

Johnnes Coetzee, captured with Marais  
the rebel who was hanged near Middleburg,  
was publicly executed for treason at Cro-  
dodell Park.

Ottawa: Mackenzie King, minister of  
labor, has recommended the re-opening of  
the mine at Alberta's mining town of  
Winnipeg, before the Privy Council.

1911—30 Years Ago

Troops were called out today to  
dispel a strike, who charged a  
police officer in an attempt to take  
possession of the dockyard and put them under  
Soviet control.

London: The freedom of the city was con-  
ferred upon Premier Meighen of Canada.  
The new sitting of the House of Commons  
A. S. Shadoff elected by acclamation for  
the Whitford constituency, the name of the  
politician having been improperly  
spelled in the nomination papers.

1912—20 Years Ago

Troops were called out today to  
dispel a strike, who charged a  
police officer in an attempt to take  
possession of the dockyard and put them under  
Soviet control.

London: Camp England: Britain successfully  
defended the English camp, the Cana-  
dian camp, the second camp, and the  
points behind.

Civic employees are to sustain a 5 per  
cent cut in the interests of economy.

E. Donovan of Detroit is reported to  
have made a strike of rich silver ore in Echo  
Bay, Great Bear Lake.

1931—10 Years Ago

Prime Minister Bennett in the  
Commons, the new Canada-Australia  
trade agreement.

Camp England: Britain: successfully  
defended the English camp, the Cana-  
dian camp, the second camp, and the  
points behind.

Civic employees are to sustain a 5 per  
cent cut in the interests of economy.

The one thing certain is that the  
Fuehrer's headquarters did not claim to

## Superman Myth Shot Again

### Even Great Nazi Victory Would Leave Germans Shorn of Prestige

By ALFRED L. WEIR

There are indications that the Germans  
may be producing before long if the  
Germans people are not to throw up the sponge  
in despair.

Even should this victory involve the  
capture of Leningrad or some other large  
city, it would still be a pyrrhic victory.

Moreover, the German army would still  
be under a terrible loss of prestige. The  
Nazis are taking in the stout Russian  
resistance is even more devastating  
than the material losses which the Germans  
have suffered since the day when an  
alliance with the democracies was turned  
down for a trade deal with the Reich.

The Nazis are taking in the high cost  
of the war, and the high cost of the  
army.

The Nazis are taking in the grandiose  
claims made in the German communiqué  
indicates that all classes and conditions  
of men could get their spiritual teeth into.

Now, the Nazis are taking in the  
spiritual teeth into.

The Nazis are taking in the high cost  
of the war, and the high cost of the  
army.

The Nazis are taking in the high cost  
of the war, and the high cost of the  
army.

The Nazis are taking in the high cost

# Alberta District News In Brief

ROCKY MOUNTAIN HOUSE

## Ice Cream Is Big Dish When Soldiers Visit

Almost every man, woman and child in town thronged the streets of Rocky Mountain House to see the convoy that stopped en route to the training camp at Red Deer after a series of military maneuvers south of town. Some 200 men were 40 trucks and about 300 men.

The trucks lined up by the curb in front of the stores, while the soldiers patrolled the streets, some buying candy, soft drinks, milk and ice cream. When the officers called them in, the men saluted and obeyed the command, clutching a cone.

A number of cars followed the convoy to the edge of town, with all the boys who had bicycles.

### Red Cross DOINGS In the Country

BRENNER—Bremner Red Cross picnic went off in fine style Friday.

Badminton, tennis, billiards, chess.

Swimming, a tug-of-war, and a

lot more.

Red Cross has had four meetings since May and have donated \$60 to the Red Cross.

Red Cross has 200 scarfs, 14 pairs of sex, five pairs of shorts, two doctors' jackets, two

and two nurses' caps.

They say they will really go to

work in earnest for the Red Cross in the fall work is done.

A farewell picnic and shower were held at the Alberta Legion hall.

Mrs. M. Knule, Sander, who

has resigned as teacher after seven

years.

After games and a picnic.

Mr. and Mrs. C. C. Cook, be-

half of parents and friends, pre-

ented Mrs. Sander with the many

tokens of love.

Mrs. Sander will make her

home in the Golden Heights

district.

BAWLF

Teachers Enjoy Holiday at Home

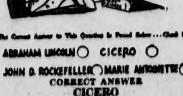

Miss Frances Justice, teacher at the school, is visiting her mother and plans to go to the coast for part of her holidays. Miss Doris Tolyko, teacher at the school, is visiting Mrs. Pearl Ritz and children, Patricia and Ronald, from Strome, Mrs. Lyle Clever from Oak Park, Mrs. Dorothy Weller from Lethbridge, Mrs. Alice Jain from Monrose, Mr. and Mrs. Gilbert and Louis from Ryker.

Mr. and Mrs. Gordon Pugh of Chirbury, Miss Berline M. Senn, Mr. and Mrs. John, Mr. and Mrs. Merril Nelson, from Donalds.

Miss Berline Meeks has gone to

Edmonton for a visit with her parents, Mr. and Mrs. Nelson Magee.

## Correct Answers to Bulletin's Quiz Contest, 208 to 216 Inc.

CORONATION

NORTVILLE

## Here's A Puzzle: Who Emptied That Old Rain Barrel?

Farmer of the Coronation district goes to bed one night recently, finds the same time a heavy cloud in the sky and begins to collect a lot of nice soft rain water in his water barrel outside. So he goes to bed.

Sure enough, comes the cloud and comes the rain—the rain comes morning, afternoon, evening, night.

So farmer gets up, scratches head and wonders who did it. So does everyone else. Was it lightning, a tiny dog—or what?

A number of cars followed the convoy to the edge of town, with all the boys who had bicycles.

Farm women are busy at the present time, with extra hands for seeding, haying, and harvesting.

The first of the four varieties of wild berries that grow here. In addition, the wild onions, wild onions, and Cleavers. River Club have had four meetings since May and have donated \$60 to the Red Cross.

Red Cross has 200 scarfs, 14 pairs of sex, five pairs of shorts, two doctors' jackets, two

and two nurses' caps.

## Conservation Board Ruling Wins Approval

It will be impossible to issue orders of the Alberta Petroleum and Gas Conservation Board and did not infringe on regulations, there would be no need to impose penalties, according to Hon. N. E. Tanner, minister of lands and mines.

When the board gives an order, it expects the companies to carry it out. If the companies stayed within the scope of the orders, there would be no need to impose penalties.

"The conservation board endeavours to be as lenient as possible in carrying out and in co-operating with the oil controller. It makes available from Turner, who has requested the controller for war purposes. An oil conservation board has made the order. I would not care to comment on it. I have put the order there to do it and I think they are doing it."

### WELLS PENALIZED

His statement was made following a telephone call in a Canadian newspaper of a story that four wells had been penalized for producing crude oil in excess of the quota. Three of the last few months would remain closed from one to three months.

It is reported that three of the wells were closed down on June 1, and the other, which had exceeded its quota, was closed down on Monday.

## New Ministry May Be Created At Ottawa Soon

OTTAWA, July 15.—(CP)—Creation of a new ministry to see that a proper wartime equilibrium is maintained between essential and non-essential consumption in Canada is expected to be announced within a month, it was said yesterday. There has been no official pronouncement from the government.

It is understood here the various controls over commodities, now exercised by Munitions Materiel, Finance and other departments, which places too great responsibility on a minister whose primary task is to keep the fighting forces supplied, is the highly complex material of war.

### ECONOMIC WARFARE

Restriction of civilian consumption, which has been the chief task of the war effort has been comparatively light so far, but current reports are that the time has come when it will have to begin sacrifices on a more general scale. One of the first demands in this direction is to be made to the Canadian exchange control board operating under the finance department, the war and trade board under the labor department.

Creation of such a ministry would bring to five the number of new departments created since the war was started. Other new departments are munitions and supply, war and national war aims, and the war and trade board under the labor department.

Creation of such a ministry would bring to five the number of new departments created since the war was started. Other new departments are munitions and supply, war and national war aims, and the war and trade board under the labor department.

But Canadian industry, handicapped by restrictions on the use of certain metals such as nickel, aluminum and steel for civilian consumption, are unable to take advantage of the situation.

Whether it would be wise to release raw materials for manufacturers to meet American demand as a means of getting a better exchange is a question for the government to decide.

This aspect of the war effort would be one of the responsibilities of a ministry of economic warfare.

## Canadians Among Lost Bomber Crew

London, July 15.—(CP)—News Agency reported Monday night from Lisbon that fragments of clothing washed ashore with a rubber boat and five parachutes indicated some members of the crew of a British plane which was lost on July 3 were Canadians.

The aircraft, believed to have been a Wellington twin-engine machine, which had the tail 10 miles north of Opicra, crashing 200 yards offshore after circling for some time while the pilot made a final approach. There was a loud explosion when the plane struck the water.

It was immediately rushed to the spot where the plane crashed but found no trace of the crew. Yesterday, a search was made to see if any wreckage was recovered. He enlisted for active service last year. An older brother, Sgt. Alan Stewart Ross, is serving in an air gunner with the R.C.A.F. overseas.

### Driving Charge

Charged with dangerous driving, Albert Seigneur, 21, was tried in September when he appeared before R.C.M.P. police at Stony Plain. Edmonton detachment of the R.C.M.P. said

Dr. Charles Camell, Ottawa, deputy minister of mines and commissioner of the N.W.T., who reported here Tuesday that the federal government planned to increase production of war minerals.

## Output Increased On War Minerals

A special effort is being made by the Dominion geological survey this year to increase discoveries and production of strategic war minerals. It was stated here Tuesday by Dr. Charles Camell, Ottawa, deputy minister of mines and commissioner of the Northwest Territories.

Dr. Camell left for the north Thursday morning in a United Air Service plane to visit Yellowknife, Atlin and the Mackenzie River area.

Accompanied by Mrs. Camell and Mrs. Crear, wife of Hon. Thomas A. Crear, minister of mines and resources, the Englishman said:

## Unity Between Anglo-S. To Win This War

Take a look—The future of the English-speaking Peoples. Elmer Gelber, graduate of Toronto University, resident of London, England, has been invited to present a guest lecture in history at the university address at the university, addressing a meeting at the university, Monday night.

Mr. Gelber said this war is a war for power, and power for freedom and democracy. Without America and America's support the democracies could not succeed. The United States must marry the British to see to it that the Americans remain to keep superiority of the ocean. The Panama Canal is the expansion of the British Empire. The British must be able to succeed but there must be unity and union.

### MIRACLE OF DUNKIRK

With the miracle of Dunkirk, the British have shown that they are right in their ruling people, but not in the Teutonic position with their own. In their position with their own, they have shown that they are strategically placed United States never has thought of Great Britain had not been greater her overseas position would not have come to the British.

The English are an island people with a world horizon. United States must have a world position.

And Europe's power is not properly distributed. United States security is in the hands. With Canadian and the U.S. resources the democracies are bound to win.

### Co-Operation For Gasoline Control

People will willingly co-operate in any gasoline consumption restrictions which the government may impose to help to save gasoline and the Empire's war effort. It was reported by business men here Tuesday that Hon. Herbert Morrison, minister of supply and munitions, was considering ways and means of meeting the regulation requirements with a minimum of inconvenience to the general public and had no comment to make on the government order.

He has some opinions on the matter.

J. A. McNeil, secretary-minister of the Alberta Ministry, said yesterday that the government's gasoline control order will bring about a saving of 100,000 barrels a day.

Increased output is being sought and obtained in gold and silver and in other parts of Canada, except aluminum which is produced only in the aluminum position is fairly good.

A special effort is being made to develop tungsten finds in the north and we are not far from the position that we can have no objections to them.

There are certain shortages of some of the war minerals," Dr. Camell said, "such as tungsten, manganese, chromium, vanadium and molybdenum."

They will travel by R.M.T. boats from Waterways to Atlinville, and return by plane.

There is a certain shortage of some of the war minerals," Dr. Camell said, "such as tungsten, manganese, chromium, vanadium and molybdenum."

There are some opinions on the matter.

Herbert Morrison, minister of supply and munitions, was considering ways and means of meeting the regulation requirements with a minimum of inconvenience to the general public and had no comment to make on the government order.

He has some opinions on the matter.

John T. Lovatson, manager of the First National Bank, said he thinks the new gasoline regulations will work any hardship on the tourists who travel to the north.

The regulations could not prove any inconvenience to our own residents for they can care for themselves and their place of residence accordingly. However, it must be remembered that the Americans will not be able to do the same thing as the British and the Germans will cause that they may run into considerable difficulty.

Enoch T. Lovatson, manager of the First National Bank, said he thinks the new gasoline regulations will work any hardship on the tourists who travel to the north.

## Anti-Blitz Units in North Ireland . . . Canadian-Made Universal Carrier . . . No Knits - No Runs . . . Nurses Baby Hawk

Mechanized units predominate in Britain's new reconnaissance corps in Northern Ireland. In the event of invasion by German forces, this Irish section of the corps will face the many problems of combat in water mobility, as well as those before the British. On top, a motorcycle is raising dust as it moves into action across a sandy track of country. Below, some Bren carriers speed across country to an "invasion point" during manoeuvres.

Several Canadian improvements in design and construction make the new Universal Carrier one of the British army's most efficient fighting vehicles. The caterpillar track and the wheel construction have been improved in Canada; extras have been added to the equipment. Above is a Canadian-made Universal Carrier undergoing tests.

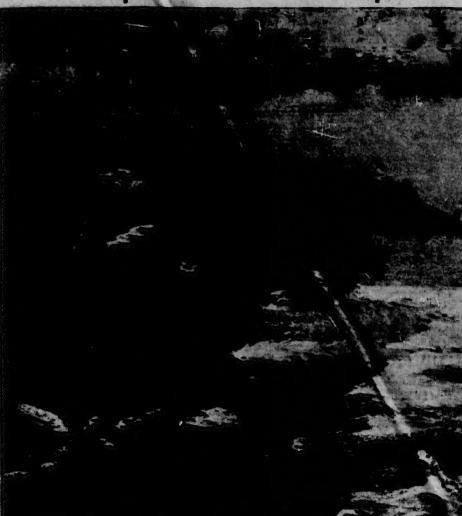

You can't buy silk stockings in Britain these days without coupons, and this girl has found a way for saving her coupons. She gives her underpinnings a coat of coloring in whatever shade she would like for her stockings. She is never bothered with runs . . . or ladders, as they call 'em in fair Albion.

Nero, a baby mountain hawk, may be only three weeks old, but his life is already adventurous. Dropped by his mother in flight, he was picked up on the roadside some 25 miles from Lake Louise by two patrolling Mounties and brought to the Simpson Lodge on Bow Lake, where the Banff-born flying star Mary is now being cared for. Nero gets daily exercise, raw beef or liver, and Mary hopes he will keep coming back for more of the same even after he is strong enough to fly. Mary is here shown at play with Nero on the shore of Bow Lake, which lies along the New Columbia Icefield Highway.

## S.S. Rapids Prince Stranded In Rapids

Hard aground is the S.S. Rapids Prince which struck a shoal while shooting the Lachine rapids with 221 passengers aboard. The passengers remained the night aboard the Rapids Prince and then were taken off by small boats. The above picture is an aerial photograph of the vessel after the passengers were removed.

Trumpeter Ross Sturley, of Vancouver, is writing all his friends and relatives the news of his great moment when Prime Minister Mackenzie King took time out to chat with him at the opening of the New Cecil Rhodes Elementary Flying School at Boundary Bay. B.C. Sturley is a member of the newly organized Air Cadets Corps.

## Rum Runners' Nemesis Now After Hitler

Two U.S. revenue cutters, once detailed to blast bootlegging boats during prohibition days, arrive at a British port with newly mounted guns bristling to operate with the Royal Navy under the lend-lease program.

Lord Cranbrook, recently paid a field visit to the Royal Canadian Division in England, left, inspects some men and shakes hands with some others to land in England.

Mr. and Mrs. Casner arrived in New York on the transatlantic *Remus*, first Swedish ship to arrive in the U.S. in several months. He is to teach at Yale University. He said the country is suffering from a string-food rationing and shortage of coffee, tea and gasoline.

## The War's "Mystery Front"

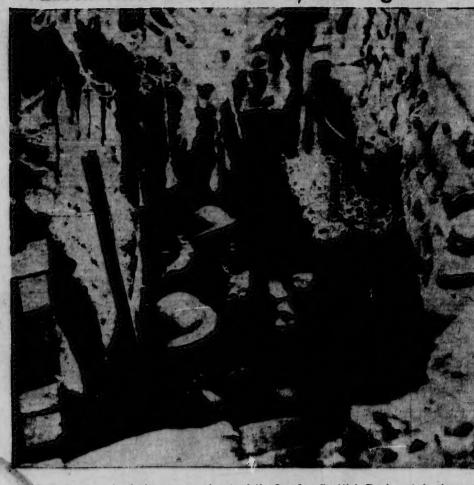

With both sides making widely contradictory claims, the German-Russian battle lines form a "mystery front" whose progress is difficult to analyze. Map, above, spots points of German advances and places where Russians claimed Nazi drives had slowed down, if not halted in several sectors.

Three women cleaners employed by a British railroad in the absence of some of their manpower with the British forces. The women are shown working on a locomotive.

## Queen Visits Trench Held By Her Regiment

Queen Elizabeth, who is honorary colonel of the London Scottish Regiment, is shown in a trench during her recent visit to that part of the defence lines held by the regiment. Part of the camouflage net that hides the trench from the air may be seen at the top of the picture.

Lord Cranbrook, recently paid a field visit to the Royal Canadian Division in England, left, inspects some men and shakes hands with some others to land in England.
